Issue ID	
JDK-8271419	Summary: Refactor test code for modifying CDS archive contents Description: The test code was modified to place the common operations on the archive file into one location so other tests can use them. The file was named CDSArchiveUtil.java.
JDK-8303770	Summary: Removed Baltimore CyberTrust Root Certificate After Expiry Date Description: The following expired root certificate has been removed from the `cacerts` keystore: alias name baltimorecybertrustca [jdk], Distinguished Name: CN=Baltimore CyberTrust Root, OU=CyberTrust, O=Baltimore, C=IE.

Issue ID

JDK-8309841	Summary: Jarsigner should print a warning if an entry is removed
	Description: If an entry is removed from a signed JAR file, there is no mechanism to detect that it has been removed using the `JarFile` API, since the `getJarEntry` method returns `null` as if the entry had never existed. With this change, the `jarsigner -verify` command analyzes the signature files and if some sections do not have matching file entries, it prints out the following warning: 'This JAR contains signed entries for files that do not exist'. Users can further find out the names of these entries by adding the `-verbose` option to the command.
JDK-8350498	Summary: Removed Two Camerfirma Root Certificates
	Description: The following root certificates, which are terminated and no longer in use, have been removed from the `cacerts` keystore: alias name camerfirmachamberscommerceca [jdk], Distinguished Name: CN=Chambers of Commerce Root, OU=http://www.chambersign.org, O=AC Camerfirma SA CIF A82743287, C=EU; alias name camerfirmachambersignca [jdk], Distinguished Name: CN=Global Chambersign Root - 2008, O=AC Camerfirma S.A., SERIALNUMBER=A82743287, L=Madrid (see current address at www.camerfirma.com/address), C=EU.

Builds of Liberica JDK With CRaC

This release of Liberica JDK includes full CRaC support. CRaC support is available for Liberica JDK 17 and 21. For more information, see Using CRaC with Java applications.

IANA TZ Data update

This release of Liberica JDK 17.0.16 upgrades the in-tree copy of the IANA timezone database to 2025b. The following are the key changes of this update:

Future Timestamps:

New Time Zone:

A new time zone, America/Coyhaique, is created for Chile's Aysén Region, which will now observe UTC−03 year-round (no daylight saving time).

- This diverges from America/Santiago starting March 20, 2025.

- Aysén will not change clocks on April 5, 2025.

- This aligns Aysén with Magallanes Region.

Past Timestamps:

Iran Time Change Correction:

Iran changed from UTC+04 to UTC+03:30 on November 10, 1978, not at the end of the year as previously recorded.

Code Fixes:

Improved behavior for the zic tool:

- It no longer creates invalid symlinks when using -l with multiple arguments.

- A buffer underflow issue is resolved.

For more information, see [JDK-8352716](JDK-8352716).
