2. What's New

This release contains the following updates and new features.

Notable Changes

This is the list of the notable issues fixed in this release.

Issue ID	
JDK-8335912/JDK-8337499	Summary: Add an operation mode to the jar command when extracting to not overwrite existing files Description: In previous OpenJDK releases, when the jar tool extracted files from an archive, it would overwrite any existing files with the same name in the target directory. With this release, a new option ('-k' or '--keep-old-files') may be specified so that existing files are not overwritten. The option may be specified in short or long option form, as in the following examples: '* jar xkf foo.jar', '* jar --extract --keep-old-files --file foo.jar'. By default, the old behaviour remains in place and files are overwritten.
JDK-8341380	Summary: Distrust TLS server certificates issued after Oct 2024 and anchored by Entrust Root CAs Description: Google and Mozilla have announced plans to distrust TLS Server certificates issued by Entrust. This enhancement implements similar restrictions in the JDK. The restrictions is enforced in the SunJSSE Provider of the Java Secure Socket Extension (JSSE) API. A TLS session will not be negotiated if the server's certificate chain is anchored by any of the Certificate Authorities specified in this issue and the certificate's notBefore date is after October 31, 2024. If necessary, you can work around the restrictions by removing 'ENTRUST_TLS' from the 'jdk.security.caDistrustPolicies' security property.

Issue ID	
JDK-8341488	Summary: Change Entrust TLS distrust date to November 12, 2024 Description: Google has changed their distrust date for Entrust from November 1 to November 12, 2024. Entrust has also changed the date they plan to use SSL.com as the issuing CA for public TLS server certificates to November 12. To align with those updated dates, the distrust date was changed to November 12, 2024.
JDK-8341533	Summary: Add 2 SSL.com TLS roots Description: New SSL.com TLS roots are added as they are the issuing CA used by Entrust going forward.
